

Bean to bar lesson plan

This lesson involves tracing the chocolate journey from bean to bar.

The lesson consists of two activities.

You can split the lesson across two sessions: Activity A takes about 1 hour, and Activity B 50 minutes.

What you'll need

- 'Mim village' photo: view on screen, or use Pa Pa Paa photo pack.
- Atlas, globe or online map.
- 'Bean to bar' photos: print out one set, or use Pa Pa Paa photo pack.
- Captions and descriptions: print 10 copies, cut up captions and descriptions.

Bean to bar lesson plan

Starter (10 mins)

Ask students where they think the journey of chocolate begins. Tell them that some of the chocolate they eat may have started life in Mim.

Look at the photo of the village of Mim together. Where in the world is it? Find some clues. What can they tell about the lives of people who live here? What else do they want to know?

Establish this is Ghana. Use atlases, globes or digital mapping tools to find it. You can type 'Mim Ghana' into Google Maps and find it that way.

Activity A (40 mins)

Divide the class into ten groups of three or four students per group. Give each group a 'Bean to bar' photo. Ask students to look carefully at their photo. What do they think is happening in it?

After a few minutes, give each group a set of captions so they can find the right caption for their photo.

When everyone has found their caption, you may wish to share out some or all of the tasks below:

- Write all the questions you can think of about your photo, e.g. Where are they? How much does the sack weigh? What does it say on the wall?
- What might have happened just before the photo was taken or just afterwards? Write about or draw what you imagine.
- If there are people in your photo, what do you think they might be saying or thinking? Give each person a speech bubble or write a short script or piece of dialogue.
- Draw up a chart to compare life in your photo with life at home. What similarities and differences can you see? e.g. Same: cloudy sky. Different: clothes.

Plenary (10 minutes)

Give each group the opportunity to share their photo and tell the class what they think is happening in it. As a class, put the photos in order. Talk through the chocolate journey from cocoa on tree to the chocolate they eat. Display the photos in the right order with captions.

Bean to bar lesson plan

The next section can be delivered as a separate lesson. If doing so, you will need all the resources from the previous lesson.

Activity B (40 minutes)

Clearly display the photos and captions.

Divide the class into ten groups of three or four students per group. Give each group a set of photo descriptions. Ask them to read the descriptions and discuss which of the captions fit each description. Once agreed, they should write the captions in the space provided.

Fix three pieces of display paper to the wall or board. Write one of the following headings on each sheet:

- In Ghana
- The journey
- In Europe

Trace the journey from bean to bar by locating Ghana, Germany and the UK on a map or globe.

Look again at the displayed photos and captions. As a class, agree where each stage happens and which description matches the caption and photo.

Take it further

- Use printed world maps or digital mapping to draw the journey of cocoa bean to bar. Label the locations and the stages in the process.
- Research how land use in Ghana is changing from cocoa farms to illegal gold mines and rubber plantations.

Plenary (10 minutes)

Discuss the following questions as a class:

- Why is cocoa grown in Ghana?
- What challenges might cocoa farmers face today?
- What challenges might cocoa farmers face in the future?
- The average age of a cocoa farmer in Ghana is 51. Why might this be? [Hint: less young people in Ghana are choosing to be cocoa farmers.] Why might this be?
